Worldflow Handbook

A Worldwide Guide to Flowmeter Selection and Suppliers

*michael faraday,
magmeter pioneer*

If you're thinking about buying flowmeters, you'll want to take advantage of the only complete and independent worldwide guide to flowmeter selection.

The *Worldflow Handbook* gives you all the information you need for every type of flowmeter:

- How to decide what type of flowmeter to use
- How to find an appropriate supplier
- How to contact the supplier

Unlike other guides produced by specific manufacturers for their products, we give you a comprehensive look at what's available on the market. We also tell you how to select the best flowmeter for a particular application.

It's as easy as One, Two, Three!

Three chapters give you the details you need:

- **The Paradigm Case Method of Selecting Flowmeters.** Information on all flowmeters by type – how they work, what they measure best, their limitations, and how to determine the best flowmeter for the job using our paradigm case method of flowmeter selection.
- **Flowmeter Suppliers.** Charts on types of flowmeters offered by manufacturers within the 10 technologies, such as bent tube Coriolis and AC magnetic flowmeters.
- **Directory of Flowmeter Suppliers.** A directory of over 250 flowmeter manufacturers and suppliers. Includes mailing and e-mail addresses, phone and fax numbers, websites, and flowmeter technologies offered.

New and Traditional Technology Flowmeters

The *Worldflow Handbook* covers suppliers of both new and traditional technology flowmeters:

- Coriolis
- Magnetic
- Ultrasonic
- Vortex
- Differential Pressure
- Positive displacement
- Turbine
- Open Channel
- Thermal
- Variable area

Use the form on the reverse side to fax us your order today or give us a call at 781-245-3200! We accept Visa, MasterCard, and American Express.
