Dear Product or Marketing Manager:

I am writing you with some very exciting news. You may already know that, for the past year, Flow Research has been working on a series of flowmeter studies. This is a series of studies that includes the entire worldwide flowmeter market. I am very happy to let you know that **we have completed the worldwide Coriolis flowmeter study.**

Volume I, **The World Market for Coriolis Flowmeters**, analyzes the fast-growing Coriolis flowmeter market. Since their introduction in 1977, Coriolis flowmeter sales have grown rapidly, and are now exceeded in revenues only by magnetic flowmeters. **This study includes complete market size and market share information for Coriolis flowmeters by geographic region. Forecasts for the market extend through 2007.** Many users who are looking for higher accuracy are selecting Coriolis flowmeters. In fact, Coriolis meters are the most accurate flowmeter available today.

Here are some of the segments included in this comprehensive study:

- Smart vs. Conventional
- Liquid vs. Gas vs. Steam
- Shipments of Smart Coriolis Flowmeters by Communication Protocol
- Shipments by Industry
- Shipments by Distribution Channel
- Shipments by Customer Type

A number of important changes are occurring in the Coriolis flowmeter market. These include the continued introduction of straight-tube meters, the introduction of low-cost Coriolis meters, and continued technology improvements. Coriolis flowmeters are also gaining more approvals from industry associations. **Here is your chance to get the inside story** on this market. We interviewed virtually every supplier worldwide and put all this knowledge together in this market study, called **The World Market for Coriolis Flowmeters.**

If you are in the flowmeter market, you don't want to miss this study. Flow Research studies are the most comprehensive available anywhere. Here's why:

- We interview and profile every supplier, not just the leading suppliers. The Coriolis flow study has 12 company profiles.
- We talk to companies all over the world, in places like Japan, Singapore, Germany, Italy, France, Lithuania, China, Taiwan, Sweden, and many other countries.

- Instead of just talking to suppliers, we also interview end-users. At the beginning of our research into the flowmeter market, we interviewed 299 end-users from the US, Europe, and Asia, and published this as a separate end-user survey.
- The study includes a product analysis for many suppliers, containing a summary, photos, and specs for their products. One chapter gives you an overview of most products offered worldwide for Coriolis flowmeters.

If you would like more detailed information on **The World Market for Coriolis Flowmeters**, please call us at 781-245-3200, or send an email to jesse@flowresearch.com. Visit our website at www.flowresearch.com for detailed descriptions of each study, and an order form.

These studies are **simply the best research available today** on the worldwide flowmeter market. Don't miss your chance to benefit from our years of experience, and the thousands of hours we have put into researching the flowmeter market. Call or write us today for further information!

Best regards,

Jesse Yoder
