Dear Product or Marketing Manager:

I am writing you with some very exciting news. You may already know that, for the past year, Flow Research has been working on a series of flowmeter studies. This is a series of studies that includes the entire worldwide flowmeter market. I am very happy to let you know that **we have completed the worldwide ultrasonic flowmeter study.**

The ultrasonic flowmeter market is a very dynamic one. There are more than 50 suppliers worldwide, and we have profiled 45 of them. **The ultrasonic study includes complete market size and market share information** segmented by geographic region. Here are some of the segments in this comprehensive study:

- Transit time vs. Doppler vs. Hybrid
- Smart vs. Conventional
- Liquid vs. Gas vs. Steam
- Shipments by Industry
- Shipments by Distribution Channel
- Shipments by Customer Type

The ultrasonic flowmeter market is the fastest-growing flowmeter market, and revenue growth is projected in the 9 percent range. Part of this growth is due to the exploding market for natural gas flow measurement. Additional market consolidation is expected, and new companies are very likely to get into this field. **Here is your chance to get the inside story** on this market. We interviewed virtually every supplier worldwide and put all this knowledge together in this market study, called **The World Market for Ultrasonic Flowmeters.**

If you are in the flowmeter market, you don't want to miss this study. Flow Research studies are the most comprehensive available anywhere. Here's why:

- We interview and profile every supplier, not just the leading suppliers. The ultrasonic flow study has 45 company profiles.
- We talk to companies all over the world, in places like Japan, Singapore, Germany, Italy, France, Lithuania, China, Taiwan, Sweden, and many other countries.
- Instead of just talking to suppliers, we also interview end-users. At the beginning of our research into the flowmeter market, we interviewed 299 end-users from the US, Europe, and Asia, and published this as a separate end-user survey.
- The study includes a product analysis for many suppliers, containing a summary, photos, and specs for their products. One chapter gives you an overview of most products offered worldwide for ultrasonic flowmeters.

If you would like more detailed information on either **The World Market for Ultrasonic Flowmeters**, please call us at 781-245-3200, or send an email to jesse@flowresearch.com. Visit our website at www.flowresearch.com for detailed descriptions of each study, and an order form.

These studies are **simply the best research available today** on the worldwide flowmeter market. Don't miss your chance to benefit from our years of experience, and the thousands of hours we have put into researching the flowmeter market. Call or write us today for further information!

Best regards,

Jesse Yoder
